

**STEAM Camps for Summer 2019**

The STEAM camps [science, technology, engineering, arts and math] is an opportunity for Rondout Valley CSD students to participate in a hands-on, project-based learning experience. Over four days this summer, students will participate in an educational experience that uses science, technology, engineering, the arts and mathematics [STEAM] as access points to inquiry, critical thinking, collaboration and communication. Students will also cultivate the process of creativity and innovation through experiential learning. There is a maximum number of 50 students for each STEAM camp and parents/guardians must provide transportation.
